Objective

Aspiring Software Engineer specializing in Java, Spring Boot, REST APIs, Microservices, and Cloud Technologies. Skilled in building scalable backend applications, database optimization, and API development using Java ecosystem technologies. Seeking an opportunity to contribute to high-performance software solutions in a product-based company or Global Capability Center.

Technical

Programming Languages: Java, SQL
Backend Development: Spring Boot, REST APIs, Hibernate, JPA, MVC Architecture, Backend Development, Microservices Fundamentals
Database: MySQL, CRUD Operations, Joins, Query Optimization
Cloud & DevOps: AWS EC2, AWS RDS, Docker, CI/ CD Fundamentals
Computer Science Fundamentals: Data Structures, Algorithms, OOP, DBMS, Operating Systems, Computer Networks

Project

ProjectRadar AI , *Technologies: Java, Spring Boot, REST APIs, MySQL, Hibernate, JPA, Gemini AI, OpenRouter*

- Developed an AI-powered project recommendation platform using Java, Spring Boot, REST APIs, MySQL, JPA, and Hibernate.
- Analyzes skills, interests, technologies, experience, and career goals to recommend 30+ relevant projects.
- Integrated Gemini AI to generate project ideas with tech stack, difficulty, and implementation approach.
- Implemented OpenRouter as a fallback AI service when Gemini AI fails or is unavailable.
- Helps students discover resume-ready, industry-relevant, and hackathon-focused projects based on their profiles.

MediCare AI , *Technologies: Java, Spring Boot, REST APIs, MySQL, Hibernate, JPA, Gemini AI, OpenRouter*

- Developed a backend healthcare system for patient, doctor, appointment, and medical record management.
- Built 15+ RESTful APIs for patient management, appointment scheduling, and medical records.
- Implemented secure CRUD operations using Hibernate and JPA with optimized entity relationships.
- Integrated Gemini AI to assist patients with enquiries and system-related information.
- Implemented OpenRouter as a fallback AI service when Gemini AI is unavailable.
- Applied MVC architecture and OOP principles for scalable and maintainable development.

Deployment Experience

Cloud Deployment (AWS + Docker)

- Deployed applications using Docker containers on AWS cloud infrastructure.
- Gained hands-on experience in server setup, application deployment, and container-based architecture for scalable systems.

Internship Experience

Java Developer Intern, *VIWISE TECH SOFTWARES*

- Developed Java applications using Core Java, Collections Framework, and OOP principles.
- Solved **100+ coding and algorithmic problems** involving arrays, strings, recursion, and exception handling. Assisted in debugging and optimizing application modules, improving code maintainability.
- Collaborated with development teams following software development best practices.
- Strengthened understanding of backend development, clean code practices, and software design principles.

Education

B.E.ComputerScienceand Engineering, *JJ College of Engineering and Technology, Trichy*
Expected Graduation - 2027 , cgpa : 8.1

Higher Secondary (HSC), *St. Xaviers' Higher Secondary School, Nagapattinam*
Percentage 73%

SSLC,*SaiRam Metric Higher Secondary School, Thiruthuraipoondi*
Percentage 75%

Achievements

- Winner – Coding Battle at Technical Symposium, demonstrating strong problem-solving and programming skills.
- Solved **150+ coding problems** across LeetCode and HackerRank focusing on Data Structures, Algorithms, and Java.
- Developed strong expertise in algorithm design, time complexity analysis, and code optimization techniques.
- Consistently practiced competitive programming and logical problem-solving to strengthen software development skills.
